

Amendments to the Claims:

The following listing of claims will replace all prior versions, and listings, of claims in the application:

1. (Currently Amended) A method for steering, in a direction Y, a supersonic projectile or a missile having a generally cone-shaped nose, that has a ~~more or less~~substantially pointed end, comprising discharging plasma over a limited sector of the outer surface of the nose and on the side of direction Y.
2. (Currently Amended) The method according to claim 1, comprising creating a plasma discharge ~~in the vicinity of~~proximate the end, over a limited sector of the outer surface of the nose and on the side of direction Y.
3. (Currently Amended) A method for steering a supersonic projectile or a missile having a nose, generally cone-shaped, that has a ~~more or less~~substantially pointed end, comprising, for each change in the trajectory of the projectile or the missile, discharging plasma ~~in the vicinity of~~proximate the end over a limited sector of the outer surface of the nose.
4. (Currently Amended) The steering method according to claim 3, comprising producing plasma discharges, for each change in the trajectory of the projectile or the missile, ~~in the vicinity of~~proximate the end and over a limited sector of the outer surface of the nose.
5. (Currently Amended) A device for steering a supersonic projectile or a missile having a nose, generally cone-shaped, that has a ~~more or less~~substantially pointed end, comprising means for emitting a plasma discharge ~~in the vicinity of~~proximate the end over a limited sector of the outer surface of the nose.
6. (Original) The device according to claim 5, wherein the means for emitting a plasma discharge comprise a triggered spark-gap, two electrodes, and a high-voltage generator.

7. (Original) The device according to claim 5, wherein the means include at least one pair of electrodes.

8. (Original) The device according to claim 6, wherein the means include at least one pair of electrodes.

Amendments to the Drawings:

The attached annotated marked-up drawing sheet makes changes to Fig. 5 and replaces the original sheet with Figs. 4 and 5.

Attachment: Annotated Marked-Up Drawing
